Characteristics

- Indica two-lined hybrid rice.
- Seed-setting rate is 82.1%.
- 1,000 grain weight is 24.7g.
- Amylose content is 14.7%.
- Grain lenght-width ratio is 3.1.

Characteristics

- Good ripening appearance.
- Seed-setting rate is 81.11%.
- 1,000 grain weight is 26.9g.
- Resistant to bacterial leaf blight and rice blast.

Characteristics

- Medium indica two-line hybrid rice.
- Moderately resistant to rice blast.
- Total grains per panicle is 205.6.
- Seed-setting rate is 84.5%.
- 1,000- grain weight is 25.0g.

GOLDEN PADDY

Growth period: 123.5 days
Plant height: 111.2 cm
Spike length: 26.6 cm
Grain number per spike:205.6 grains

Strong root and Safe from lodging.
High resistance to rice blast and high resistance to bacterial blight.
Yield potential is above 13.1T/ha in Asian country.

Outstanding Yield Potential Heat Tolerant Premium Grain

SILVER PADDY

Growth period: 124.4 days
Plant height: 121.8 cm
Spike length: 24.6 cm
Grain number per spike:204.7 grains

Strong root and Safe from lodging.
High resistance to rice blast and high resistance to bacterial blight.
Yield potential is above 11.5T/ha in Asian country.

Good Disease Resistance | Strong Grain Quality | Lodging Resistant

PLATINUM PADDY

Growth period: 121.5 days
Plant height: 108.7 cm
Spike length: 23.6 cm
Grain number per spike:169.4 grains

Strong root and Safe from lodging.
High resistance to rice blast and high resistance to bacterial blight.
Yield potential is above 9.1T/ha in south Asian country. And this variety is aromatic rice with high amylose content.

High Yield Strong Grain Quality Superior Productivity
